### Profile

---

DM/DEWA-certified Electrical Engineer and SIRA-certified Security Systems Engineer passionate about delivering innovative, future-ready electrical and ELV solutions across complex construction and infrastructure projects.

With extensive hands-on experience spanning underground works, installation, testing, commissioning, and final project handover, I specialize in the seamless integration of advanced electrical and low-current systems including power distribution, lighting, CCTV, access control, intercom systems, structured cabling, BGM, and enterprise networking solutions.

Driven by precision, performance, and technical excellence, I am recognized for leading multidisciplinary teams, optimizing system performance, and delivering high-quality engineering solutions that combine reliability, efficiency, and modern technology standards.

### Education

---

2021 – 2023

Dubai, UAE

#### **Bachelor of Electrical and Electronics Engineering**

Heriot Watt University 

Completing my Electrical and Electronics Engineering degree at Heriot-Watt University, a prestigious British institution, was a transformative experience. The curriculum at Heriot-Watt was comprehensive and in-depth, allowing me to delve deeper into specialized areas of electrical engineering. The university's strong research focus enabled me to engage in cutting-edge projects and broaden my understanding of emerging technologies. I learned from renowned faculty members and benefited from their expertise in the field. Heriot-Watt's emphasis on critical thinking and problem-solving honed my analytical skills, making me well-prepared for complex engineering challenges. My time at Heriot-Watt University, a British institution with a rich academic heritage, equipped me with a deep knowledge of electrical engineering and a strong academic foundation for my career in the field.

2019 – 2021

Dubai, UAE

#### **Bachelor of Electrical and Electronics Engineering**

Amity University Dubai 

During my two years at Amity University Dubai pursuing Electrical and Electronics Engineering, I gained a strong foundation in the fundamental principles of electrical engineering. The program emphasized a practical approach, and I had the opportunity to work on various hands-on projects and experiments. The university's multicultural environment exposed me to diverse perspectives, which enhanced my problem-solving skills and adaptability. Additionally, I learned to collaborate effectively with peers from different backgrounds, a skill crucial in the globalized engineering industry. Amity University Dubai provided me with valuable insights into the application of engineering concepts and instilled a passion for innovation in me.

Egypt

#### **high school diploma**

Fuwa Secondary School For Boys

## Professional Experience

---

2023 – present  
Dubai, UAE

### Electrical & Low Current Engineer

*Dove Contracting LLC* 

during a pivotal phase of the Noor Al Baheya company's growth and existing of the Sister Company DOVE CONTRACTING LLC.

- Initially specialized in electrical engineering projects, focusing on system design, installation, and maintenance.
- Demonstrated adaptability and an eagerness to learn as I embraced various roles and responsibilities aligned with the evolving needs of the organization.
- Gained valuable insights into both electrical and mechanical systems, continually broadening my understanding of how these disciplines intersect and complement each other.
- Maintained a steadfast commitment to upholding industry standards and safety regulations, ensuring the highest levels of quality and safety across all projects.
- Actively pursued ongoing professional development, staying abreast of industry trends and emerging technologies to remain at the forefront of the field.
- Encouraged a culture of innovative thinking within the team, fostering an environment where creative solutions were actively sought and developed.

2022 – 2023  
Dubai, UAE

### Electrical Engineer Internship and Current Sponsor

*Noor Al Baheya Electromechanical Works* 

- Played a pivotal role as an Electrical Engineer during my academic years, gaining hands-on experience in various facets of electrical engineering, with a focus on low current systems.
- Actively engaged in electrical system design, installation, maintenance, and troubleshooting, contributing to the efficient functioning of various projects.
- Collaborated with cross-functional teams, fostering a multidisciplinary approach by working closely with the mechanical department on integrated projects.
- Gained comprehensive knowledge of electrical and mechanical systems, allowing for a holistic understanding of engineering solutions.
- Actively participated in the design and implementation of electrical and mechanical components for projects in the fields of firefighting, HVAC, and plumbing.
- Acquired practical skills in managing and coordinating electrical and mechanical aspects within complex projects, enhancing project efficiency and quality.
- Continuously expanded my technical repertoire through exposure to diverse tasks, bridging the gap between electrical and mechanical engineering domains.
- Contributed to problem-solving and innovative solutions at the intersection of electrical and mechanical engineering, fostering a holistic engineering mindset.

## Projects

---

### Westwood By Intiaz

*Residential Building (2B+G+P+10F), Al Furjan, Dubai*

- Designed and implemented the **CCTV Surveillance System** for security monitoring.
- Installed and configured the **IP Video Intercom System** for secure resident communication.
- Deployed and integrated the **Access Control System** for restricted area management.

### Ellington Beach House

*Residential Building (B+G+7, Two Blocks), Palm Jumeirah, Dubai*

- Executed all **electrical works**, including power distribution, lighting, containment, and earthing systems.
- Prepared **detailed shop drawings, load schedules, single-line diagrams, and submittals**

Installed and configured complete **ELV systems**:

- **CCTV Surveillance**
- **IP Video Intercom**
- **Access Control System**
- **Structured Cabling & Network Infrastructure**

- **Background Music System**
- Coordinated with consultants for **approvals**, and with MEP and civil teams for **site integration**.
- Led **testing, commissioning**, and **final handover** procedures with full documentation.

#### **Westwood Grande I By Imtiaz**

*Residential Building (G+4P+14+R), JVC, Dubai*

- Installed and configured the **CCTV System** for facility surveillance.
- Implemented the **IP Video Intercom System** for communication and visitor handling.
- Installed the **Access Control System** to manage entry and enhance security.

#### **Westwood Grande II By Imtiaz**

*Residential Building (G+4P+15+R), JVC, Dubai*

- Installed and configured the **CCTV System** for facility surveillance.
- Implemented the **IP Video Intercom System** for communication and visitor handling.
- Installed the **Access Control System** to manage entry and enhance security.

#### **Pearl House III By Imtiaz**

*Residential & Commercial Building (G+4P+11+R), JVC, Dubai*

- Executed all **electrical works**, including power distribution, lighting, containment, and earthing systems.
- Prepared **detailed shop drawings, load schedules, single-line diagrams**, and **submittals**

Installed and configured complete **ELV systems**:

- **CCTV Surveillance**
- **IP Video Intercom**
- **Access Control System**
- **Structured Cabling & Network Infrastructure**
- **Background Music System**
- Coordinated with consultants for **approvals**, and with MEP and civil teams for **site integration**.
- Led **testing, commissioning**, and **final handover** procedures with full documentation.

#### **Terrazzo Residences**

*Two nos. of (G+5F+R) Residential & Commercial Buildings, JVC, Dubai*

- Executed all **electrical works**, including power distribution, lighting, containment, and earthing systems.
- Prepared **detailed shop drawings, load schedules, single-line diagrams**, and **submittals**

Installed and configured complete **ELV systems**:

- **CCTV Surveillance**
- **IP Video Intercom**
- **Access Control System**
- **Structured Cabling & Network Infrastructure**
- **Background Music System**
- Coordinated with consultants for **approvals**, and with MEP and civil teams for **site integration**.
- Led **testing, commissioning**, and **final handover** procedures with full documentation.

**Skills**

---

**Electrical and Electronic Engineering**   ● ● ● ● ●

- \* Circuit design and analysis for both analog and digital systems.
- \* Control systems design and implementation.
- \* Electrical system modeling and simulation.
- \* Power distribution and transmission systems.
- \* Electronics troubleshooting and repair.
- \* Signal processing and data analysis.
- \* Embedded systems development.
- \* Microcontroller programming (e.g., Arduino, Raspberry Pi).
- \* PCB design and layout.
- \* Electromagnetic field analysis.
- \* Instrumentation and measurement techniques.
- \* Renewable energy systems (solar, wind, etc.).
- \* Industrial automation and robotics.
- \* Digital signal processing (DSP).
- \* Power electronics and motor control.
- \* Electric vehicle (EV) charging systems.
- \* Compliance with electrical codes and standards (e.g., NEC, IEC).

**Mechanical Interests:**   ● ● ● ● ●

- \* Firefighting systems design, installation, and maintenance.
- \* HVAC system analysis, optimization, and energy efficiency.
- \* Plumbing system design, troubleshooting, and maintenance.
- \* Thermodynamics and heat transfer analysis.
- \* Fluid dynamics and fluid mechanics.
- \* Mechanical system modeling and simulation.
- \* Building management systems (BMS) integration.
- \* HVAC control systems and automation.
- \* Energy management and sustainability practices.
- \* Piping system design and layout.
- \* Refrigeration systems and refrigerant management.
- \* Fire protection system design and codes.
- \* Plumbing fixture selection and installation.
- \* Sustainability and green building practices.

**Software Proficiency:**   ● ● ● ● ●

- \* AutoCAD for electrical and mechanical design.
- \* MATLAB and Simulink for modeling and simulation.
- \* LabVIEW for data acquisition and control.
- \* SolidWorks or other 3D modeling software for mechanical design.
